# Cylinders

# Global leaders in cylinder manufacturing

the market demands in every different area.

TESA ASSA ABLOY cylinders are manufactured TESA ASSA ABLOY's range of cylinders includes according to the most advanced production a great variety of profiles in every system. processes, offering an extremely secure high TESA ASSA ABLOY also offers the possibility of quality product and meeting the requirements combining mechanical cylinders with access control systems.

#### Security

Ranging from the most basic to the highest security patented, restricted-key models, our cylinders have been equipped with the most advanced protection systems: spring loaded pins, antiremoval system, etc., as befits TESA ASSA ABLOY's position as the first European cylinder manufacturer.

Our restricted key systems guarantee that no blank keys will be found in the market, thus ensuring protection against counterfeit keys.

#### A wide range

We have classified our systems according to four standards:

- » Type of key (dimple or sawn)
- » Restricted key
- » Degree of security
- » Masterkeying capacity

The combination of such standards has created a peerless range in the market, covering every requisite in projects ranging from the residential to the institutional, from cost-efficient technical systems to high security patented systems, offering the distributor maximum profitability.

#### Masterkeying capacity

All TESA ASSA ABLOY systems can be master keyed. A masterkeying is a planned locking system in which the master key can open more than one cylinder, even if each cylinder has its own key. For offices, residential homes and plants of various sizes, masterkeying is the immediate solution that allows to establish an access control while reducing the number of keys that must be handled: security and comfort.

D

### Guaranteed by TESA ASSA ABLOY

TESA ASSA ABLOY meets the most demanding European standards for architectural fittings, in which cylinders are very important components in terms of protection and personal safety. Specifically, the EN 1303 European standard establishes five degrees of security (fire resistance, security against breakage, number of combinations, durability and corrosion resistance) for cylinders, based on design requisites and on practice tests simulating an attack.

The DIN standard specifies which standards must be met by cylinders in order to obtain masterkeying certifications. Other standards and certifications met by TESA ASSA ABLOY's cylinders are UL (USA), NEN (Holland) ands SS (Sweden).

### **TESA WIZARD. Express Service**

### Introduction

### Masterkey systems

- » Express manufacturing deadline 24h.
- » Express Delivery 24 additional hours.
- » Small surcharge for masterkeying.
- » A wide range of systems.

# 48 hours Masterkeying Each owner may only open his/her own home.

Entrance door Garage Roofton Lift

One single key opens all shared areas.

### Key copies

- » Express manufacturing deadline 24h.
- » Low shipment fees. Express Delivery 24 additional hours.
- » A wide range of systems.
- » Monitoring of the key copie. Delivered in a sealed envelope with the requested amount of copies.

hours

Now we will list the various subjects that we will tackle in this chapter:

- » Terminology employed when specifying the various parts that form a cylinder.
- » Selection criteria. Things that you should bear in mind when recommending any given system.
- » Systems. In this section we will define the features of each model.
- » Profiles and models for specific applications.
- » Masterkey systems. Where the most frequent diagrams are shown.
- » Accessories (blank keys, etc)

### Glossary

	Descripción
1	Barrel or body. The frame that supports the whole assembly
2	Plug/rotor. The main element that forms the cylinder's transmission. It sends the rotating motion from the key to the cam.
3	Cam.It operates the lock. It may come in various sizes depending on the manufacturing or design of the lock. In Spain, both types are used frequently 15 mm radius (for wooden doors) or 13,2 mm (for aluminium or PVC doors).
4	Clutch. The part that allows the user to monitor the side that sends the motion from the key to the cam. A version of the clutch exists that allows the user to open from the outside in case the key is inserted from the inside. This is called 'DS clutch' (DS = 'doble sentido', both directions).
5	Lower pin (main row). The part that determines the combination in a specific cylinder. It will condition the depth of puncturing that a correct key must have.
6	Upper pin (main row). It complements the lower pin and allows for the blocking of specific key combinations.
7	Spring. It loads the pin and makes it possible to bring it back
8	Key. The main accessory of the key. It allows the user to open the door.

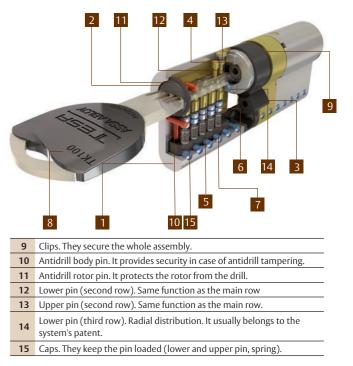

### Selection criteria

To select the most adequate model, TESA ASSA ABLOY recommends taking into account the following points.

- » Key type. Either sawn or dimple.
- » Security level. Determines the performance of the cylinder against different opening methods.
- » Profile. Refers to the shape of the cylinder. Depends on the type of lockset.
- » Finish. There are two options. Either brass or nickel.
- » Measurement. It will depend on the door thickness.
- » Function. Specify the way of operating with the key. From both

### Summary chart

sides (double cylinder), only one side (single cylinder) or "one side key and thumb turn the other" (Cylinder & turn function).

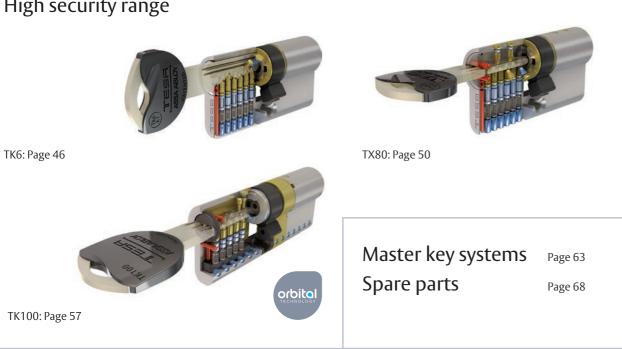

- » Type of cam. It will be determined by the type lockset (for wooden doors, PVC doors...etc)
- » Format. Key to differ (there are no relationship between one cyl. and another), key alike (all the cylinders will be operated with the same key) and master keyed (where a hierarchy determines which keys can open particular doors).

### Visual index

## Standard cylinders

### TE5 system

Nickel-plated steel key.

#### Security

- » 5 spring-loaded pins.
- » 3 keys for each cylinder
- » Certified according to the EN1303 standard:2005

#### Masterkeying

- » 10 heights per position.
- » Only available for MKS extensions.

### TD5 system

Patented nickel-plated brass key.

#### Security

- » 5 spring-loaded pins.
- » 3 patented keys for each cylinder
- » Certified according to the EN1303 standard:2005
- » Protected key copies available only presenting the propriety card.

#### Masterkeying

» It features a MULTIPROFILE tree.

### Security cylinders

### T60 system

Nickel-plated brass key.

#### Security

- » 6 spring-loaded pins.
- » 5 keys per cylinder
- » Antibump system
- » Antidrill protection
- » Certified according to the EN1303:2005 standard

#### Masterkeying

- » Lateral pins available.
- » Only available for MKS extensions.

### High Security cylinders

### TD60 system

Patented, non-duplicable key.

#### Security

- » 6 + 1 spring-loaded antipick pins.
- » Antidrill tempered steel pins in the barrel and the rotor.
- » Antibump system.
- » 3 patented, protected keys.
- » Certified according to the EN1303 standard
- » Protected key copies available only presenting the propriety card.

#### Masterkeying

» Featuring a MULTIPROFILE system.

Masterkeying

Security

Security

\*\*\*

### T70 system

#### Patented, non-duplicable key.

#### Security

- » 6 spring-loaded pins.
- » 5 non-duplicable, cylinder-patented keys.
- » Antibump and antidrill system, degree 2.
- » Double antisnap protection.
- » Antiextraction system DEGREE 2.
- » Narrow neck on the key.
- » Certified according to the EN1303:2005 standard
- » Protected key copies available only presenting the propriety card.

#### Masterkeying

» Available in KD and KA, not in AM.

### T80 system

Nickel silver key.

#### Security

- » 6+2 spring-loaded pins.
- » 5 keys per cylinder
- » Antibump system
- » Antidrill protection

#### Masterkeying

» Side pins available.

Masterkeying

# Masterkeying Security \*\*\* \* \* \*

### TK6 system

Patented, non-duplicable key with SENSOR system.

#### Security

- » 6 + 1 spring-loaded antipick pins.
- » Antidrill tempered steel pins in the body and the rotor.
- » Antibump system.
- » 3 patented, protected keys.
- » Certified according to the EN1303 standard
- » Protected key copies available only presenting the propriety card.

#### Masterkeying

» Side pins available.

### TX80 system

#### Patented, non-duplicable key with SENSOR system.

#### Security

- » 6 + 2 + 1 spring-loaded antipick pins.
- » Antidrill hard metal pins in the body and the rotor.
- » Preinstalled double clutch.
- » Antibump system.
- » 5 patented, non-duplicable keys
- » Certified according to the EN1303:2005 standard
- » Protected key copies available only presenting the propriety card

#### Masterkeying

» Various side pins and keyways available.

### TK100 system

Patented, non-duplicable key with SENSOR system. Compatible with RFID technology (optional).

#### Security

- » 5 + 5 pins with multiple-tip tear-shaped section. (An exclusive TESA ASSA ABLOY technology).
- » Anti-milling pins on rotor front.
- » Hard-metal antidrill pins in the body and the rotor.
- » Built-in escutcheon / antiextraction rotor
- » Advanced antibump.
- » The bridge has been reinforced with a steel bar. Maximum degree according to the applicable laws.
- » Double clutch as standard. » 5 patented, protected keys.
- » Certified according to the EN 1303:2005 standard
- » Cylinder compatible with narrow-inlet escutcheons.
- » Protected key copies available only presenting the propriety card.

#### Masterkeying

» Maximum permutation capacity through the new (patented) orbital combination system.

### 682 Switching lock

Cylinders designed to commute an electric circuit using a key. There are three different models.

#### 682 M23 model

#### Options

- » 2C. Includes 2 switches commuting two circuits simultaneously.
- » 1C. One only switch activates a circuit.
- » CR. Made with one switch and automatic return..
- » 2P. Lets to extract the key in two different positions. (Only available in Tx80 range)

#### Applications

» Lift, garages and automatisms in general.

Max. Voltages: 0-15 VAC / 5A and 15-30 VAC/ 3A

#### 682 M27model

#### Options

- » 2C. Includes 2 switches commuting two circuits simultaneously.
- » 1C. One only switch activates a circuit.
- » CR. Made with one switch and automatic return.

#### Applications

» Lift, garages and automatisms.

#### Max. Voltages: 0-15 VAC / 5A and 15-30 VAC/ 3A

#### 683 model

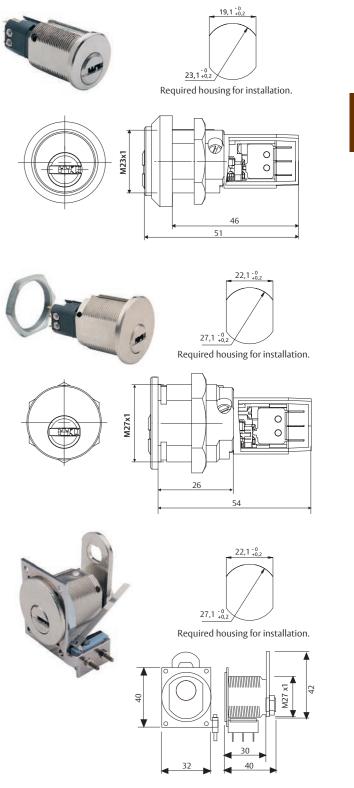

#### Options

- » 1C. One switch and a cam to activate an only circuit.
- » CR. Made with one switch and automatic return.

#### Applications

» Lifts, garages and automatisms.

Max. Voltages: 0-15 VAC / 5A and 15-30 VAC/ 3A

### Profiles

### **Profiles**

### 682 cam locks

There are two versions available (M23 and M27) provided each with the lever shown on the technical drawing.

#### 682 cam lock M23.

#### Options

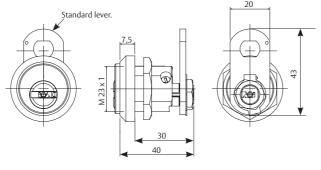

» Different locking lever designs for different door thicknesses.

#### Applications

» Mail boxes, Box offices...etc.

#### 682 M27 cam-lock.

#### Options

» Different locking lever designs for a range of door thicknesses.

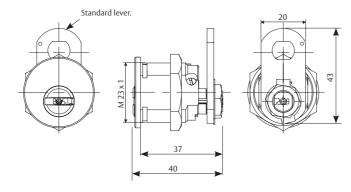

#### Applications

» Safes, box offices...etc.

Required housing for installation.

### 682 Cam-lock

### 1. Opening type (possibilities)

This cam locks can be adapted very easily if you need to modify the standard turning. There is only to change the side where screw shown in the image is located.

The standard lever is 43mm long and flat and can be installed either vertical or horizontally. Thanks to the double window stamped at both sides.

#### Turn to the right (Standard)

#### Turn to the left (Fixing screw changed) Vertical window.

 $\ominus$ 

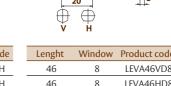

Lever black = locked / Lever white = Unlocked

### 2. Length and bent of the lever.

For those cases where a lever different to standard is needed we select the most appropriated from the list bellow.

			Lenght	window	Product code
37	V + H	LEVA37VH	46	8	LEVA46VD8
40	V+H	LEVA40VH	46	8	LEVA46HD8
43	V+H	LEVA43VH	48	6	LEVA48VD6
46	V+H	LEVA46VH	48	6	LEVA48HD6

Minimum order gty. 5

#### 4. Anti-turn plate.

Scope of delivery: 5 units. Their mission is to avoid turning the cylinder while the user is operating with the key.

Turn to the right. Horizontal window.

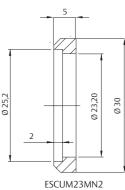

Turn to the left (Fixing screw changed) and horizontal window.

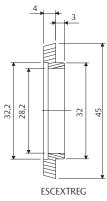

### 3. Ring shields.

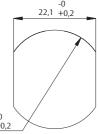

Useful when the length of cylinder is too much. There is one model for each shell dimension (M23 & M27)

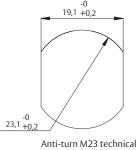

(For cylinders M23)

(For cylinders M27)

Anti-turn M27 technical measures of the hole

measures of the hole

### Profiles

### Other features available in cylinders

### Modularity

New version in European profile thought to complete the range of measurements that are not available with the regular part numbers.

In addition to that, the modular version strengthens the core of the shell thanks to the union bar used which is made of steel. To transfer an order using the corresponding part numbers (see the chapter T60, T80 and TX80) the specific dimension for side A-B will be required. The cam only if it is not R15 (DIN version).

### Service key cylinder

**THE LIMITED ROTATION MOTION** feature in the cylinder provides the cylinder with different rotation angles to the cam, depending on the key that will be inserted. Every cylinder is supplied with a service key and an ownership key.

**SERVICE KEY**: It can only activate a limited rotation angle in the cam. The result is that this key only allows the user to activate the latch, not the locking lever.

The service key will not be able to lock the door with a lever, neither will it open the door once the lever has been pulled. The SERVICE key is identified with a GREEN pin.

**OWNER'S KEY**: It will be possible to activate the 360° rotation cam, which will allow the user to activate the latch + lever in order to open or close the door. The OWNER keys are identified with a RED pin.

This feature is available in the TX80. The references are of the **TX8.....LIM** type.

### Anticorrosion and antisoiling

#### Anticorrosion

These cylinders provide components whose finishes increase considerably the cylinder's resistance in corrosion and salinity environments.

#### Antisoiling

These cylinders prevent dirt from entering the keyway (Dust-Cover Solution).

The ANTICORROSION and ANTISOILING features are available in the TX80. The references are of the **TX8G......** type.

# Components and modular heads

Solution developed to assemble unusual measurements in a quick and simple way.

#### Advantages:

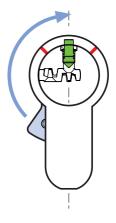

- » Snap resistance. With these assemblies you will increase this level.
- » Express deliveries. Cylinders can be assembled in the hardware store.
- » To assemble every cylinder format (double, single, knob...) or measurement, TESA ASSA ABLOY recommends both kits and the heads (available from T60).

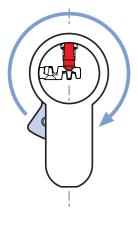

Modular kit

Spare part kit

SERVICE KEY

OWNER'S KEY

### Standard cylinder TE5

# Standard cylinder TE5

### Technical data

TE5 covers the basic segment of the range. Entirely manufactured and assembled in Spain is the most balanced solution for regular and master keyed installations.

#### Characteristics

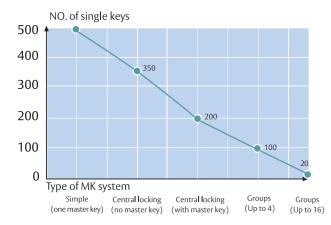

- » Type: Sawn key. (Steel nickel plated).
- » Number of rows: 1
- » Number of pins: 5
- » Technology: Tumbler regular.
- » Permutation level: Grade 5.
- » Corrosion resistance: Grade B.
- » Pick protection: Medium level.
- » Lifespan: 50,000 test cycles.
- » 3 keys per cylinder.
- » Conform to EN-1303 regulation.

#### Options

- » Finishes: Brass / Nickel plated.
- » Cam: DIN R15 and R13
- » Formats available: key to differ, master keyed, key alike and specific codes.
- » Wide measurement and profile range.

#### Master key systems.

The platform which supports its manufacturing lets combine 10 heights per position. Thanks to that, the TE5 can face master key systems with total working guarantee. Capability graph (Average quantities)

#### European standard regulation

In the same way as the main models included in the catalogue, TE5 is certified according to the European standard regulation.

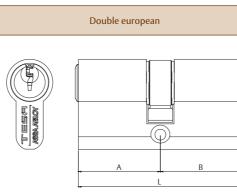

1	5	0	В	0	В	2	0
Key resistance (Grade 0-1)	Lifespan (Grade 4-6)	Door mass (Not applied in cylinders)	Fire resistance (Grade 0-A-B)	Safety of the people (Not applied in cyliders)	Corrosion and temperature resistance (Grade 0-A-B-C)	Key related security (Grade 1 to 6)	Attack resistance (Grade 0-A-B-C-D)

#### Recommendations

- » Use TESA ASSA ABLOY lubricant to lengthen the maximum lifespan of the cylinder.
- » Use original keys to make copies.
- » For safety reasons, when you install a new cylinder, remember that once installed, it should not project more than 1mm.

### Technical Data

TD5 is a PATENTED cylinder that covers the basic segment of the TESA ASSA ABLOY range with a cost-benefit balanced solution for master keyed installations.

#### Characteristics

- » Type: Sawn key (Brass nickel plated).
- » Number of rows: 1
- » Number of pins: 5
- » Technology: Tumbler
- » Permutation level: Grade 2
- » Corrosion Resistance: Grade C.
- » Pick protection: Medium level
- » Lifespan: 100.000 test cycles
- » 3 keys per cylinder

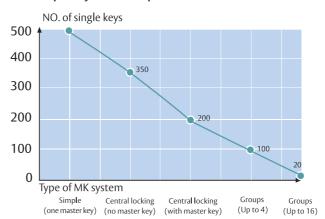

#### Options

- » Finishes: Brass/Nickel plated
- » Cam: DIN R15 and R13
- » Number of pins: 5
- » Formats available: Master keyed
- » Patent protection: TD5 cylinder is patent protected on the key and cylinder.
- » Wide size and profile range.

#### Master keyed system

The platform which supports its manufacturing combine 5pins with 10 heights per position. TD5 cylinder includes a MULTIPRO-FILE tree to face master key systems with total working guarantee, increasing by 4 the monoprofile MKS combinatory.

#### Mks capacity in monoprofile

D

### European standard regulation

In the same way as the main models included in the catalogue, TD5 is certified according to the European standard regulation.

1	6	0	В	0	С	2	0
Key resistance (Grade 0-1)	Lifespan (Grade 4-6)	Door mass (Not applied in cylinders)	Fire resistance (Grade 0-A-B)	Safety of the people (Not applied in cyliders)	Corrosion and temperature resistance (Grade 0-A-B-C)	Key related security (Grade 1 to 6)	Attack resistance (Grade 0-A-B-C-D)

#### Recommendations

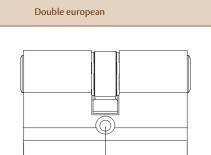

- » Use lubricant to lengthen the maximum lifespan of the cylinder.
- » Use only ORIGINAL TESA ASSA ABLOY KEYS.
- » For safety reasons, when you install a new cylinder, remember that once installed, it should not project more than 1mm.

\* The brass-plated finish in R13 is only available in sizes up to 80mm.

### Technical data

Reversible dimple key system which covers basic security levels.

#### Characteristics

- » Type: Dimple key. (Brass nickel plated).
- » Number of rows: 1
- » Number of pins: 6
- » Combination level: Grade 5
- » Technology: Tumbler regular.
- » Corrosion resistance: Grade B.
- » Anti pick system.
- » Drill resistant.
- » Bump proof cylinder lock.
- » Lifespan: 100,000 test cycles.
- » 3 / 5 keys per cylinder.
- » Conform to EN-1303 regulation

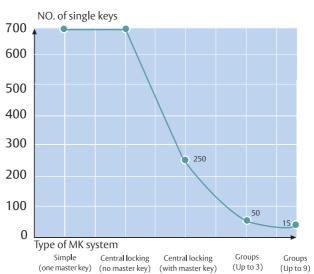

#### Options

- » Double security clutch.
- » Modular. (For unusual measures o anti snap protection)
- » Cams: DIN R15, R13 and different pinion gears.
- » Finishes: Brass / Nickel plated.
- » Formats available: Key different, mater keyed, key alike and specific codes.
- » Wide size and profile range.

#### Masterkey systems

The platform that supports its manufacturing makes it possible to combine a maximum number of 7 heights per position. The T60 is a suitable system for Masterkey systems where complexity levels are not too high.

#### ONLY AVAILABLE FOR ADDITIONS

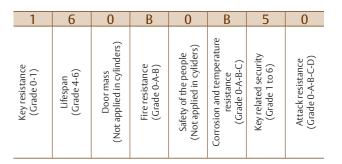

D

### European standard regulation

T60 is certified according to the standard EN 1303 regulation, getting the following results.

#### Recommendations

- » Use TESA ASSA ABLOY lubricant to lengthen the maximum lifespan of the cylinder.
- » Use original keys to make copies.
- » For safety reasons, when you select a new cylinder, remember that once installed, it should not project more than 1mm.

\* If you wish to order copies of the same key or masterkeying, just add KA or AM at the end of each reference.

\* In the case of Masterkey systems, only available for MKS extensions.

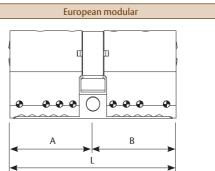

\* In order to choose the finish, select 'L' for brass or 'N' for nickel as the last letter in the code.

\* The brass-plated finish in R13 is only available for sizes up to 80mm.

### European profile

These part numbers are assembled with a 10 teeth pinion gear and outside diameter of 24 mm. The clutch housing is aligned with the tooth. They are not compatible with double security clutch.

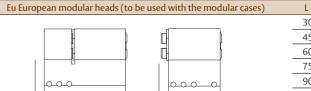

6 7

7

These part numbers are for modular cylinders assembled from the factory. Measurements for side A and B will be required when processing an order. The Cam, only if it is different to the standard (R15).

### **Technical Data**

The TD60 is a PATENTED cylinder that covers the medium range of TESA ASSA ABLOY cylinders with a solution based on security and combinatory, ideal for masterkeyed installations that require a balanced solution in terms of features and costs.

#### Features

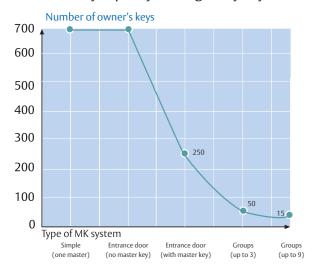

- » Type of key: dimple reversible (Nickel-plated brass)
- » Number of rows: 1
- » Number of pins: 6
- » Technology: Tumbler
- » Combinatory: Degree 5 » Corrosion Resistance and T<sup>o</sup>: Degree C.
- » Antipick: Medium level
- » Durability: 100,000 cycles. » 3 PATENTED keys per cylinder.
- Options

- » Finishes: Brass/Nickel » Cams: DIN R15 or R13
- » Available formats: Masterkey systems.
- » Patent: The TD60 features a patent in the key and the cylinder. » A wide range of sizes and profiles.

### System for Masterkey systems

The TD60 has 6 pins with 7 heights configuration. It includes a MULTIKEYWAY tree that allows the user to ensure the correct operation of Masterkey systems that require higher capacity - the capacity is four times higher than with the singlekeyway model.

### Combinatory capacity for single-keyway:

NEN

#### Regulations

As well as the main models featured in TESA ASSA ABLOY's catalogue, the TD60 has been certified according to tests specified by European standards.

1	6	0	В	0	C	5	0
Key resistan ce (Grade 0-1)	Lifespan (Grade 4-6)	Door mass (Not applied in cylinders)	Fire resistance (Grade 0-A-B)	Safety of the people (Not applied in cyliders)	Corrosion and temperature resistance (Grade 0-A-B-C)	Key related security (Grade 1 to 6)	Attack resistance (Grade 0-A-B-C-D)

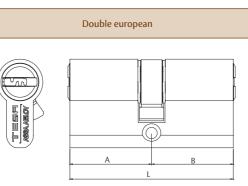

\* Note; With an E700 escutcheon, antisnap resistance reaches degree 2.

#### Recommendations

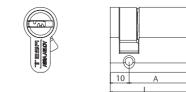

- » Always use TESA ASSA ABLOY lubricant in order to increase the service life of the cylinder.
- » Use only original blank keys for your copies.
- » For security reasons, every time you replace or recommend a cylinder size please note that, once it has been installed, it must not protrude more than 1 mm.

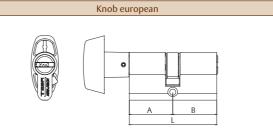

### European profile

- \* TD60 is only available in Masterkeying. To order cylinders add AM at the end of the partnumber.
- \* In order to choose the finish, select 'L' for brass or 'N' for nickel as the last letter in the code.
- \* The brass-plated finish in R13 is only available for sizes up to 80mm.

These part numbers are assembled with a 10 teeth pinion gear and outside diameter of 24 mm. The clutch housing is aligned with the tooth. They are not compatible with double security clutch.

These part numbers are for modular cylinders assembled from the factory. Measurements for side A and B will be required when processing an order. The Cam, only if it is different to the standard (R15).

\* TD60 is only available in Masterkeying. To order cylinders add AM at the end of the partnumber.

## T70 Anti-Snap Cylinder

### Technical details

The T70 cylinder has been specially designed to provide a guaranteed solution against SNAP attacks, while also providing efficient anti-extraction, anti-bump and anti-drill protection. The (patented) head of the key presents a special configuration that makes it compatible with NARROW HEAD escutcheons. The cylinder's security is also supported by a patent, ensuring that the key can not be duplicated.

#### Features

#### Basic

- » Type of key: Flat, non-duplicable and patented.
- » Number of rows: 1
- » Number of pins: 6+1 security sensor in the cylinder.
- » Combinatory: Degree 5
- » Resistance to corrosion and temperature: Degree C
- » Durability: 100,000 cycles

#### Anti-Tampering Protection

- » Double ANTI-SNAP protection:
- via fuse slot
- via reinforced steel bar
- » ANTIBUMP system
- » Anti-pick protection
- » Anti-drill protection: DEGREE 2
- » Anti-extraction protection: DEGREE 2

#### Narrow Head

» Special configuration of the (patented) head of the key. Compatible with narrow-profile escutcheons.

#### Key protection

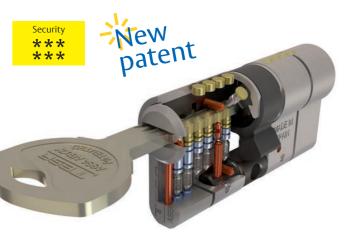

- » Patented key and cylinder.
- » Key duplication and cylinders are protected by property card.

#### Certification

» Certificated according to EN1303

#### Options

- » Brass and nickel-chromed finishes
- » Cams: R15 and R13.
- » Optional: cylinders in KD and key alike. Not available in master keying.
- » Europrofile range, padlock and 682 and adjustable round shape.

D

### Regulations

As well as the main models featured in TESA ASSA ABLOY's catalogue, the T70 has been certified according to tests specified by European standards.

1	6	0	В	0	C	5	D
Resistance of the key (Degree 0-1)	Durability (Degree 4 to 6)	Door mass and locking force (Not applicable for cylinders)	Apt for use with firebreak doors (Degree 0-A-B)	Personal safety (Not applicable for cylinders)	High resistance to corrosion and temperature (Degrees 0, A, B, C)	Security of the key (Degree I to 6)	Anti-tampering resistance (Degree 0-A-B-C-D)

#### Recommendations

- » Use TESA ASSA ABLOY lubrication for an optimum service life of the cylinder.
- » Always keep the ownership card in order to make copies of the keys.
- » Follow the mounting instructions supplied with the cylinder for the correct mounting of the product.

# Security cylinder T80

### Technical data

Reversible dimple key with open key blank distribution.

### Characteristics

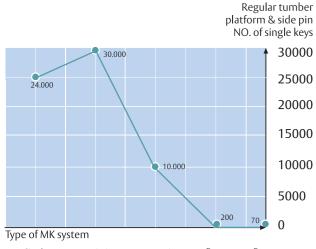

- » Type: Dimple key. (Nickel silver).
- » Number of rows: 2
- » Number of pins: 8
- » Combination level: Grade 6
- » Technology: Tumbler regular.
- » Corrosion resistance: Grade B.
- » Anti pick cylinder lock
- » Drill resistant.
- » Bump proof model. » Lifespan: 100,000 test cycles.
- » 3 / 5 keys per cylinder.
- » Conform to EN-1303 regulation

#### Options

- » Double security clutch.
- » Modular. (Specially designed for either unusual measurements or anti snap protection)
- » Cams: DIN R15, R13.
- » Finishes: Brass / Nickel.
- » Formats available: Key different, master keyed, key alike and specific codes.
- » A wide range of sizes and profiles.

### Master key systems

The eight position chambers and the possibility of varying side pins makes T80 the most suitable option for those master key systems where the number of key functions is large and the copy control is not required.

Simple Central locking Central locking Groups Groups (Up to 47) (Up to 91) (one master key) (no master key) (with master key)

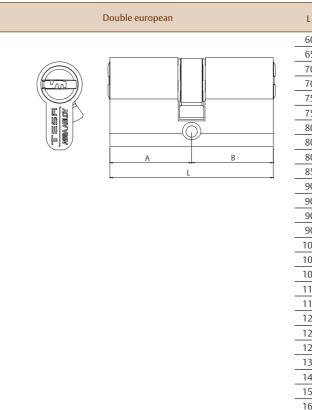

#### Recommendations

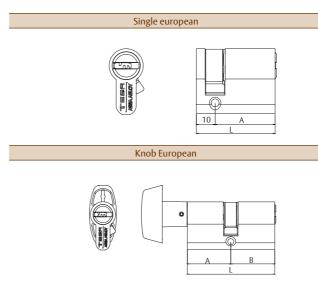

- » Use TESA ASSA ABLOY lubricant to lengthen the maximum lifespan of the cylinder.
- » Use original keys to make copies.
- » For safety reasons, when you select a new cylinder, remember that once installed, it should not project more than 1mm.

### **European profile**

\* If you wish to order copies of the same key or masterkeying, just add KA or AM at the end of each reference.

\* Brass-plated finish in R13 NOT AVAILABLE

### High security cylinder TK6

### Technical data

New model designed to cover two basic necessities in the market. On the one hand has been made with an exclusive and patented combination technology to solve complex master key suites and on the other hand a new security sensor lets the owner control all the keys in one installation.

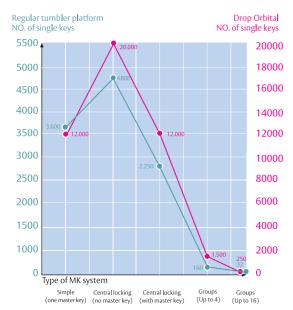

### Characteristics

- » Type: Patented sawn key with security sensor.
- » Number of rows: 1
- » Number of pins: 6.
- » Technology: DROP ORBITAL (Exclusive TESA rights)
- » Permutation level: Grade 6.
- » Corrosion resistance: Grade C.
- » Anti pick cylinder lock (High resistance.)
- » Bump proof system.
- » Drill protection.
- » 3 patented keys made of nickel silver.
- » Conform to EN-1303 regulation.
- » Lifespan: 100,000 test cycles.
- » Master key systems: Medium capability in combination with DROP ORBITAL platform.

#### Options

- » Finishes: Brass / Nickel.
- » Cam: DIN R15 and R13
- » Formats available: Key different, mater keyed, key alike and specific codes.
- » A wide range of sizes and profiles.
- » Colour pins to differentiate master key levels.

### Master key system

Masterkeving

Security

#### European standard regulation

In the same way as the main models included in the catalogue, the TK6 is certified according to the European standard regulation.

1	6	0	В	0	C	6	0
Key resistance (Grade 0-1)	Lifespan (Grade 4-6)	Door mass (Not applied in cylinders)	Fire resistance (Grade 0-A-B)	Safety of the people (Not applied in cyliders)	Corrosion and temperature resistance (Grade 0-A-B-C)	Key related security (Grade 1 to 6)	Attack resistance (Grade 0-A-B-C-D)

\*Note; with the shield E700 the attack resistance rise to the level 2.

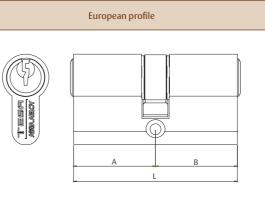

#### Recommendations

- » Use TESA lubricant to lengthen the maximum lifespan of the cylinder.
- » TESA ASSA ABLOY recomends to the user of the TK6 to keep the property card in a safe and secure location. Only by presenting this card, can one obtain key and cylinder copies.
- » For safety reasons, when you install a new cylinder, remember that once installed, it should not project more than 1mm.

### High security cylinder TX80

### Technical data

TX80 cylinders have been designed according to the highest quality protection systems. It is a model in constant evolution that incorporates the most advanced security developments (bumping, picking...etc). A design thought to offer to the user the higher security grade in all its extension.

#### Characteristics

- » Type: Patented dimple key with security sensor.
- » Number of rows: 2
- » Number of pins: 8
- » Technology: Tumbler regular.
- » Permutation level: Grade 6.
- » Corrosion resistance: Grade C.
- » Anti pick cylinder lock (High resistance.)
- » Bump proof system.
- » Drill protection grade 2.
- » Lifespan: 100,000 test cycles.
- » Key copies protected with security card.
- » Clutch of double security.
- » 5 patented keys made of nickel silver.
- » Conform to EN-1303 regulation.
- » Master key systems: High capability using side pins and multi profile key ways.

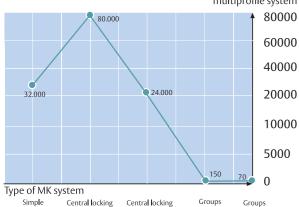

#### Options

- » Finishes: Brass / Nickel.
- » Cam: DIN R15 and R13.
- » Formats available: Key different, mater keyed, key alike and specific codes.
- » A wide range of sizes and profiles.
- » Colour pins to differentiate master key levels.

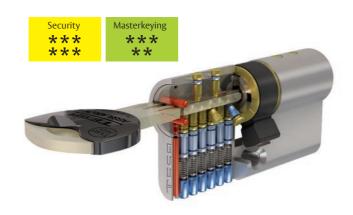

#### Master key systems

The patented character of the system will let the owner control, in every moment, the key copies thanks to the property card provided with each cylinder or master key suite.

> Single keys with side pins and multiprofile system

Central locking Central locking (one master key) (no master key) (with master key) (Up to 100) (Up to 200)

#### European standard regulation

In the same way as the main models included in the catalogue, TX80 is certified according to the European standard regulation.

1	6	0	В	0	C	6	D
Key resistance (Grade 0-1)	Lifespan (Grade 4-6)	Door mass (Not applied in cylinders)	Fire resistance (Grade 0-A-B)	Safety of the people (Not applied in cyliders)	Corrosion and temperature resistance (Grade 0-A-B-C)	Key related security (Grade 1 to 6)	Attack resistance (Grade 0-A-B-C-D)

\*Note; with the shield E700 the attack resistance rise to the level 2.

#### Recommendations

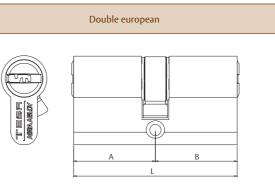

- » Use TESA ASSA ABLOY lubricant to lengthen the maximum lifespan of the cylinder.
- » TESA ASSA ABLOY recomends to the user of the TX80 to keep the property card in a safe and secure location. Only by presenting this card, can one obtain key and cylinder copies.
- » For safety reasons, when you install a new cylinder, remember that once installed, it should not project more than 1mm.

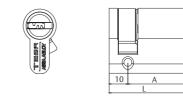

The patented nature of the system allows the owner of the installation to monitor at all times the copies of keys and/or cylinders being done.

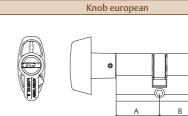

### High security cylinder TX80 Patented

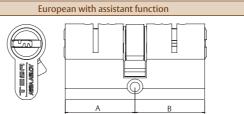

### **European profile**

\* To process "master keyed" and "key alike" orders add either AM or KA in each part number, respectively.

\*\* The butler system lets operate with the key from the outside even if knob is blocked. Is a solution thought for schools, geriatrics..etc.

### Technical data

TK100 cylinders have been designed with the most exclusive protection systems. This newly version integrates, in addition of the patent, an exclusive orbit combination system which fully surpass the maximum key security grade specified in the standard regulation. In addition to that, this new manufacturing concept improves against non destructives opening methods such us bumping, picking...etc. To complete the maximum security grade in all its extension, this model incorporates extra protections to resist the most usual attacks applied when breaking in.

In terms of drill protections, TK100, in addition of incorporating hardened pins, includes a new protector shield integrated. With this new cylinder, TESA ASSA ABLOY starts a new gait which lead the future in all the cylinder range.

#### Features

- » Type of key: Flat, non-duplicable and patented.
- » Number of rows : 2
- » Number of pins: 10 + 2 security sensors in the key.
- » Technology: DROP ORBITAL (TESA ASSA ABLOY Exclusive)
- » Combinatory: It reaches way above the degree 6 of the standard.
- » Masterkey systems: Superior capacity with no need to use passive pins.
- » Resistance to corrosion and temperature: Degree C
- » Advanced antibump.
- » Top antipick protection.
- » Antipick protection way above the maximum degree specified by the European standard.
- » Antiextraction rotor.
- » Corona pins on rotor front.
- » The bridge of the body features preinstalled reinforced steel.
- » Resistance: 200,000 cycles.
- » Preinstalled double-security clutch.
- » 5 narrow-neck keys per cylinder.
- » New, ergonomic key design.
- » Key duplication and cylinders are protected via ownership card.
- » Certified according to the EN 1303 standard.

#### Options

- » Finishes: Brass / Nickel.
- » Cam: DIN R15 and R13.
- » Formats available: Key different, mater keyed, key alike and specific codes.
- » A wide range of sizes and profiles.
- » Colour points to differentiate master key levels.

#### Master key systems

The new orbit permutation system TESA ASSA ABLOY has patented gives TK100 the highest level of security ever seen in the market. For that reason, TK100 is de ideal system for master keyed requirements. It does not matter how complex the master keying is. TK100 will solve, widely, every type of lock charts.

D

### European standard regulation

TK100 widely surpass the different laboratory tests specified in the standard European regulation.

1	6	0	В	0	C	6	D
Key resistance (Grade 0-1)	Lifespan (Grade 4-6)	Door mass (Not applied in cylinders)	Fire resistance (Grade 0-A-B)	Safety of the people (Not applied in cyliders)	Corrosion and temperature resistance (Grade 0-A-B-C)	Key related security (Grade 1 to 6)	Attack resistance (Grade 0-A-B-C-D)

#### Recommendations.

- » Use TESA ASSA ABLOY lubricant to lengthen the maximum lifespan of the cylinder.
- » TESA ASSA ABLOY recomends to the user of the TK100 to keep the property card in a safe and secure location. Only by presenting this card, can one obtain key and cylinder copies.
- » For safety reasons, when you install a new cylinder, remember that once installed, it should not project more than 1mm.

### Master key systems

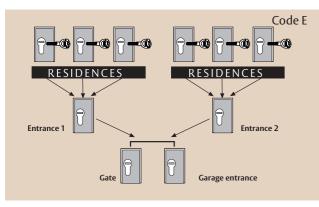

## How can I order a masterkeying?

A master key system is a planned locking system where a master key can open more than one cylinder, even if each cylinder has its own key. For offices, residential homes and blocks of various floors, the master key system is the immediate solution that allows to establish an access control while reducing the number of keys that must be handled: security and comfort.

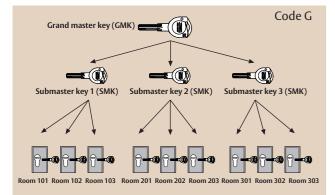

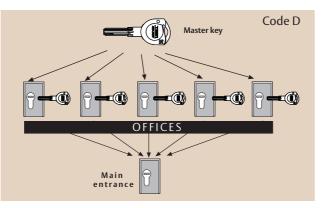

Central locking with several levels. (Apartment blocks type)

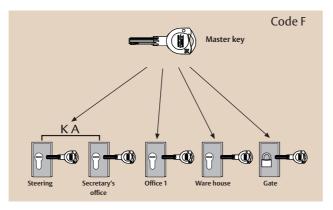

Group master key suite. (Hotel type)

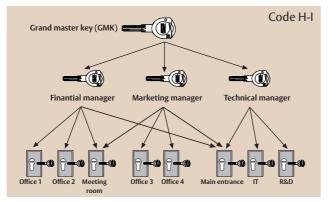

Central locking system with master key. (Company type)

Simple master key suite.

Complex master key system (Company type)

### 1. Masterkeying partnumbers for each cylinder

TESA ASSA ABLOY allows you to use its masterkeying service, regardless of the cylinder model you have chosen.

Add to the reference of the spare cylinder: KA, for key alikes, or add to a key number, and AM for the rest of the Masterkey systems.

Example KEY ALIKE:	Example Masterkey systems:
TX853030N <u>KA</u>	TX853030N <u>AM</u>

### 2. A surcharge is added depending on the type of masterkey system

	Product code		
Туре	System	Code	Code description
		А	Copies of the same key
	TE5	В	To a key number
	TD5	C	Simple entrance door masterkeying

### TESA ASSA ABI OY WIZARD. **Express Masterkey Systems**

#### Service ONLINE MASTERKEYING SERVICE

TESA ASSA ABLOY's 24-hour service delivers the masterkeying to the shipping company in 24 hours (calculated in working days (TESA ASSA ABLOY Irún's calendar) from the moment the order accepted by TESA ASSA ABLOY is taken.

All orders processed via this service will be free of charge. The system is based on the TESA ASSA ABLOY WIZARD platform for the introduction of online orders.

(In order to register, please contact TESA ASSA ABLOY).

#### **Requirements:**

- 1. Maximum: 100 cylinders per order. In case of bigger amounts, it will not be possible to 'split' the amount in several orders.
- 2. All customers making online orders before 5 pm are guaranteed to receive the order the following (working) day. In case of exceptional causes, a message will be sent to VoBo customer.
- 3. 24-hour orders may not be cancelled.
- 4. The customer must register as a TESA ASSA ABLOY WIZARD user. Every customer will have an ID a well as an user code and a password.

#### RANGE

#### Sawn key (TE5-TE6-TD5)

Double cylinder or knob-cylinder:

- » From 30x30 to 50x50 with 5-mm increases to R15 cam in BRASS-plated and NICKEL-plated finishes
- » Sizes 30x30 35x35 30x40 40x40 30x50 with cam R13 (Finish only in NICKEL)

#### Half cylinder:

» From 30x10 - 35x10 - 40x10 - 50x10 and 30R x 10 (Adjustable) with R15 cam in BRASS-plated and NICKEL-plated finishes.

NEW

NOW ALSO in

» 30x10 sizes with R13 cam and finish only in NICKEL.

#### Dimple key ( T60-TD60-T80-TX80):

Double cylinder or knob-cylinder:

- » From 30X30 to 40X40 with 5-mm increases with RI5 cam and BRASS-plated and NICKEL-plated finishes.
- » Sizes 30x30 35x35 30x40 40x40 30x50 with R13 cam (Finish only in NICKEL)-
- Half cylinder:
- » Sizes 30x10 35x10 40x10 with R15 cam and BRASS-plated and NICKEL-plated finishes.
- » 30x10 size with R13 cam and finish only in NICKEL.
- 682 cylinder:
- » M23 and M27 (+48h extra).
- » Electric and mechanical activation.
- » NICKEL-plated finish.

Note: Cam 13,2 mm (for metal keys) valid in TE5, T60 and T80 system sizes 30x30, 30x40, 35x35, 30x10, 30x50, 40x40, 30B30 (only LN).

In case the order includes any cylinder not specified in the range (due to the amount, a special reference or a complexity issue), you must consult the factory about the new deadline

### TESA ASSA ABLOY WIZARD. Express Service of Key Copies

TESA ASSA ABLOY's 24-hour service also includes the ONLINE service of key copies, delivered to the shipping company in 24 hours calculated in working days (TESA ASSA ABLOY Irún's calendar).

Key copies via TESA ASSA ABLOY WIZARD are available in the following systems and formats:

#### FORMATS

- » Copies of KD and KA keys.
- » Copies of keys with AM cylinders (both calculated in TESA ASSA ABLOY WIZARD as outside of WIZARD)

<b>SYSEEMS</b>	» TD60	» TX80 (Both V	2
» TD5	» T70	and VD)	
» TE6 (Keyway KT1)	» T80	» TK100	
» T60	» TK6 (Keyway K1D)		

### TESA ASSA ABLOY

With this service, your orders will be manufactured in 48 hours. Always according to TESA ASSA ABLOY's calendar and considering that has been processed within the range specified latter on. In addition, the order has to specify the term "express 48h delivery".

#### Working conditions:

- 1. Maximum order quantity: 100 units
- 2. Daily time limit: 11.00 am GMT 1:00. Orders received later will be posponed one day.
- 3.48 hour orders can not be cancelled.
- 4. The orders must be specified in a lock chart made on excel or similar application.

#### Serrated key (TE5-TE6-TD5)

- Double cylinder or knob-cylinder: » From 30x30 to 50x50 with 5-mm increases to R15 cam in
- BRASS-plated and NICKEL-plated finishes » Sizes 30x30 - 35x35 - 30x40 - 40x40 - 30x50 with cam R13
- (Finish only in NICKEL)

Half cylinder:

- » From 30x10 35x10 40x10 50x10 and 30R x 10 (Adjustable) with R15 cam in BRASS-plated and NICKEL-plated finishes.
- » 30x10 sizes with R13 cam and finish only in NICKEL.

Note: Cam 13,2 mm (for metal keys) valid in TE5, T60 and T80 system sizes 30x30, 30x40, 35x35, 30x10, 30x50, 40x40, 30B30 (only LN). In case the order includes any cylinder not specified in the range (due to the amount, a special reference or a complexity issue), you must consult the factory about the new deadline

#### HOURS/SERVICE

TESA ASSA ABLOY sends orders with a 24-HOUR SERVICE (Available materials in the warehouse) as long as the orders have been made before 5 pm. From that moment on, 24 hours are added.

#### **ORDERS/LINES/SHIPPING COSTS**

TESA ASSA ABLOY recommends you to bring together the maximum number of key copies in one single order, generating one single shipping and, consequently, one single shipping charge. You may order copies of different key references in one single order.

The software generates ONE SHIPPING CHARGE PER ORDER. It is not possible to GROUP SEVERAL ORDERS UNDER ONE SHIPPING CHARGE, but TESA ASSA ABLOY WIZARD provides the option of including all lines of copies in one single order by using the DRAFT option.

#### Flat key ( T60-TD60-T80-TX80):

Double cylinder or knob-cylinder:

- » From 30X30 to 40X40 with 5-mm increases with RI5 cam and BRASS-plated and NICKEL-plated finishes.
- » Sizes 30x30 35x35 30x40 40x40 30x50 with R13 cam (Finish only in NICKEL)-

### Modularity

#### Modular cases.

Both cases and the primary modules will let you assemble every measurement and format (double cylinder, single and thumb turn) in a very short time. Moreover, with this version and thanks to the union bars, these assemblies strengthen the snap resistance.

#### Modular KIT

Product code	Components included	Qty.	Components included	Qt
	Sloted modular body extension of 5mm	4	Modular bar of 1+5 holes.	2
	Sloted modular body extension of 10mm	4	Modular bar of 1+6 holes.

### **Pinion** gears

	Product code	Description
024	EXCZ10D24	50 pinion gears with 10 teeth. Outside diameter is 24 mm and thickness, 8mm. Compatible with gears from both tooth and bottom land.
	EXCZ10D24V	50 pinion gears with 10 teeth. Outside diameter is 24 mm and thickness, 8mm. Compatible with gears from the bottom land.
	EXCZ10D24D	50 pinion gears with 10 teeth. Outside diameter is 24 mm and thickness, 8mm. Compatible with gears from the tooth.
	EXCZ13D30KSO	50 pinion gears with 13 teeth. Outside diameter is 30 mm and thickness, 4mm. Compatible with gears from the bottom land.

### Key-contact electric cases

#### The electric cases activate an electric circuit by means of a key.

#### Mechanical features

- » Protection degree: IP 54
- » Requires a 30x10 cylinder of 8 positions with the cam located 90° to the left. (25° cam for the model: interlocking with key extraction)
- » Sizes:
- Aluminium box: 75 x 75 x 52mm. Front (mortise model): 100 x 125mm.

#### Electric features

- » Microswitch: Maximum voltage 220Vac Maximum intensity 5A » Led Maximum Voltage 12Vac
- Available models of:
- » Rim or mortise
- » 2 or 3 positions
- » LED indicator option

#### Features

The multifunction microswitch allows the user to establish the right option for each application. One single model can operate with return function or interlocking.

#### Applications

- » **Return**: In applications where the activation of the microswitch puts the electric circuit into service. Example: garage doors. Once the key rotates, it activates the microswitch and later a spring enables the return for the extraction of the key.
- » Interlocking: For applications where it is convenient to have the key secured during the operation of the electric circuit. Example: In a hotel room, as an energy disconnector. When the key rotates, it remains secured and activates the microswitch.

Models with interlocking are suitable for two different applications by merely switching the cam's position.

- 1. Cam 90° to the left (9 hours): when the key rotates, the circuit is closed. In order to remove the key, it must return to the original position and the circuit will remain open. In order to close the circuit, the key must be inside the box.
- 2. Cam to 25°: It allows the user to leave the circuit connected or disconnected by removing the key.

D

Model	Positions	LED	Mounting
CEL1ME	2	No	Mortise
CEL1MS	2	No	Rim
CEL1LE	2	No	Mortise
CEL1LS	2	No	Rim
CEL2ME	3	Si	Mortise
CEL2MS	3	Si	Rim
CEL2LE	3	Si	Mortise
CEL2LS	3	Si	Rim

### Cylinder for electric case with adjustable cam

- » These cases require a 30 x 10 cylinder and a cam 90° to the left (9 hours).
- » Except for the 1ME model with closed / open micro and key extraction: 25° cam.

Euro half-adjustable	Sist.	Ref.	Sist.	Ref.

HIE				

\* The references do not include the cylinder (order separately)

### Notas

### Disconnector with micro + interlocking

This case model allows for two different applications by merely switching the cam's position:

### 1. Cam 90° to the left: Energy-saving device for hotels with cylinder (usually with lighting)

The model with 1 Micro and lighting (1L) and a 687 mortise case is particularly suitable to be used as an energy-disconnecting device in hotel rooms; air conditioning, lights, heating, etc.

The room's masterkeyed key is inserted in the case and, once it rotates, all electric switches can be connected.

When a guest leaves the room and removes the key from the case, all devices remain disconnected.

This systems reduces the use of electricity by limiting the use of energy exclusively to the hours spent by the guest in the room.

These cases may be mounted on all of TESA ASSA ABLOY's existing devices.

### 2. Cam to 25°: Connecting / disconnecting device with key extraction

This model allows the user to connect the microswitch and remove the key leaving the micro connected. To do this you must rotate the key 180° to the right and return to the original position y removing the key. At this moment, the micro remains permanently closed. In order to disconnect the micro, you must rotate the key 180° to the left and return the key to the original position by removing it.

The micro will remain permanently open.

#### Applications

Those elements that work by day (open micro) but remain permanently disconnected (closed micro) by night.

### **TESA ASSA ABLOY maintenance spray**

A product specially developed to maintain the correct working of the cylinder lock.

#### Product description:

» It cleans and lubricates the cylinder.

- » It protects the cylinder from the corrosion and rust.
- » Appropriate between -40° and 600°C
- » Content of each can: 50ml
